Recruitment Team  
Goldman Sachs

Dear Recruitment Team,

I am a third-year Computer Science student at NIT Calicut applying for the Summer Analyst Program at Goldman Sachs. I am eager to contribute my technical foundation and problem-solving mindset to your innovative team.

I have hands-on experience in **C**, **C++**, **JavaScript**, and full-stack development using **ReactJS**, **MySQL**, and **Git**. In a recent DBMS project, I co-developed a **Warehouse Management System** that streamlined procurement and delivery workflows using a MySQL backend and HTML/CSS frontend.

Beyond academics, I contributed to the organization of a campus-wide esports tournament, where I coordinated with teams to ensure smooth participation and timely execution of events. This experience strengthened my communication and organizational skills. I also enjoy staying active through sports and other extracurricular activities, which have helped me build discipline and teamwork.

Goldman Sachs' leadership in financial technology inspires me, and I am excited about the opportunity to grow professionally while contributing to meaningful projects this summer.

Thank you for considering my application. I would be grateful for the opportunity to discuss how I can contribute to your team.

Sincerely,

Etta Srinith Reddy
